# Calcium

Calcium is a mineral that is essential in building strong bones when you're young, as well as keeping your teeth strong and healthy. Calcium also aids in regulating muscle contractions, including your heartbeat.

Foods that contain high levels of calcium include dairy products such as milk, yoghurt, and cheese. Additionally there are some green leafy vegetables which contain small amounts of calcium, as well as some foods that are fortified with

calcium including cereals and bread. Find out more about information at: [www.nhs.uk/conditions/vitamins-and-minerals/calcium/](http://www.nhs.uk/conditions/vitamins-and-minerals/calcium/)

Did you know that around 99% of the calcium in our bodies is in our bones and teeth?
